Overall balance

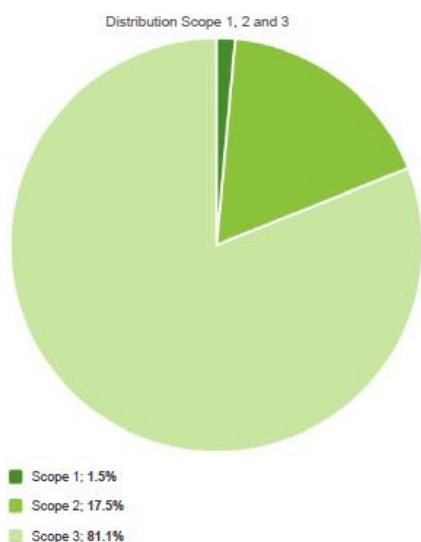

Company

PIRDREI Hotel HafenCity Hamburg

Balance sheet item

Operational greenhouse gas balance according to the GHG Protocol

Emissions & description of the accounting area

Scope 1	kg CO _{2e}
Electricity	0
Fuels	5.857
Heat & Cold	0
Scope 2	
Electricity	0
Heat & Cold	70.117
Scope 3	
Purchased goods and services	313.848
Fuel and energy related activities	94.896
Upstream transport	3.188
Process related waste	-131.114
Business trips	9.669
Employee travel	34.678
In total	401.112
Plus 10% safety surcharge	40.111
Total incl. 10% safety margin	441.223

GHG emissions per overnight stay

Accounting period: 01/01/2025 to 31/12/2025

Description of system boundaries: The greenhouse gas inventory for Gut Heckenhof for the year 2025 was prepared in accordance with the recognised 'Greenhouse Gas Protocol' standard and covers Scope 1-3 emissions that are under the control of the farm. To determine the emissions, recognised databases such as Gemis 5.1, EEW, UBA and ifeu were used. A safety margin of 10% was applied to account for any unaccounted-for quantities in Scope 3. In Scope 3, some extrapolations were made which involve a degree of uncertainty.

The balance were prepared by:

Titisee, 25.05.2026
